
How to catch a star- extended write.

What would you do if you caught a star of your very own?

Where would you go and what would you do there?

In Oliver Jeffers' book, *How to catch a Star*, we see a young boy who desperately wants to catch a star of his own. He tries lots of different ways to catch the star but I would like you to tell the boy, how he can catch the star.

I would like you to write a step by step guide about how to catch a star. Make sure you make the instructions clear so that the boy can catch a star of his very own.
