

Dear Class 5 and parents,

Hello, I hope this letter finds you well and happy. I miss you all and our time together hugely. Especially reading stories together (if you left me enough room to squeeze into the book corner). I even miss the daily reminders to do the register, by whoever was particularly on the ball that morning...

I hope you have managed to fill this time apart with lots of fun and laughter because now it is time to get back to work (with some fun and laughter included)!

In Science will be exploring Earth and space. We will study the movement of the Earth and planets through practical investigation. You will hypothesise, observe and record to uncover the exciting truths hidden within our solar system.

Our English and reciprocal reading work will be inspired by the book A Wrinkle in Time. This exciting and moving story explores travel through space and time; allowing us to combine our creative writing with our scientific knowledge.

I will be providing a maths activity pack that will include arithmetic and reasoning problems. It is important that we consolidate areas already covered and push ourselves on to further challenge.

Work at a steady speed and remember to check through your work thoroughly. We will all be back together in what will seem like no time and by then you should be expert polishers! However, until then I have copied the link to our class song (I have listened to it often!).

I would love to know what you have been up to over this time apart therefore please feel free to email me. Similarly, if you have any questions about the following work please contact me on eharris@willowbrook.notts.sch.uk.

Kind regards,

Miss Harris
