

This week, we will be revising, practising and extending our skills in the area of 'numbers to 10 million - place value.'

1. Draw counters in the place value chart to represent the number 472,573

Millions			Thousands			Ones		
H	T	O	H	T	O	H	T	O

2. Draw counters in the place value chart to represent the number 3,785,302

Millions			Thousands			Ones		
H	T	O	H	T	O	H	T	O

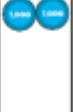

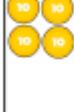

3. Write the following number in numerals and words.

Millions			Thousands			Ones		
H	T	O	H	T	O	H	T	O

4. Write the following number in numerals and words.

Millions			Thousands			Ones		
H	T	O	H	T	O	H	T	O

5. Suzy's number is shown below. She adds 4000 to her number. Write the new number in numerals and words.

Millions			Thousands			Ones		
H	T	O	H	T	O	H	T	O
		  	  	  	 		   	   

6. Luke's number is shown below. He adds 80 to his number. Write the new number in numerals and words.

Millions			Thousands			Ones		
H	T	O	H	T	O	H	T	O
		  	  	  	 		   	   

1

Roll a  six times.

--	--	--	--	--	--

- Arrange the numbers to make the **greatest possible number**.
- Now rearrange them to make the **smallest possible number**.
- Work out the **difference** between your two numbers.

2

Put a digit in the missing space below to make the sentence correct.

$$2,63\boxed{},667 < 2,633,66\boxed{}$$

Is there more than one option?

Can you find them all?

3

What number am I thinking of?

- The number has four digits.
- It is less than 6000 but greater than 5000.
- The hundreds digit is smaller than 6 but bigger than 4.
- The tens digit is an odd number smaller than 7 but bigger than 3.
- The ones digit is in the three times table and is bigger than 6 but smaller than 10.

4

Make your own 'What is the number?' question.

Ask a partner to solve the question.

5

started with the number 345,754.

She added 3 counters to the same column.

Her new number was greater than 346,000.

Which column could  have added her counters to?

Millions			Thousands			Ones		
H	T	O	H	T	O	H	T	O

Is there more than one solution?

6

Cap Boy rolls a dice 7 times and records the digits.

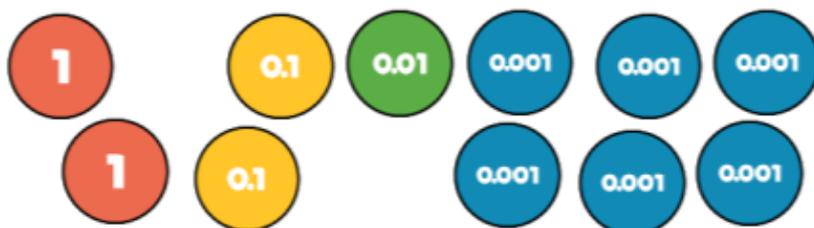

says, "If I arrange the digits in **ascending order**, I will create the smallest number possible."

Is  correct? Prove it.

Complete the sentences.

There are ____ ones, ____ tenths, ____ hundredths and ____ thousandths.

The number in digits is _____

Use counters and a place value chart to represent these numbers.

3.456

72.204

831.07

Hundreds	Tens	Ones	Tenths	Hundredths	Thousandths

Write down the value of the 3 in the following numbers.

0.5**3** **3**62.44 7**3**9.8 0.01**3** **3**,420.98

Four children are thinking of four different numbers.

3.454

4.445

4.345

3.54

Teddy: “My number has four hundredths.”

Alex: “My number has the same amount of ones, tenths and hundredths.”

Dora: “My number has less ones than tenths and hundredths.”

Jack: “My number has 2 decimal places.”

Match each number to the correct child.

Identify the number represented on the place value chart.

Thousands	Hundreds	Tens	Ones	Tenths	Hundredths
			● ●	●	

Multiply it by 10, 100 and 1,000 and complete the sentence stem for each.

When multiplied by ____ the counters move ____ places to the ____.

Fill in the missing numbers in these calculations

$$32.4 \times \boxed{} = 324$$

$$1.562 \times 1,000 = \boxed{}$$

$$\boxed{} \times 100 = 208$$

$$4.3 \times \boxed{} = 86$$

Use the place value chart to divide the following numbers by 10, 100 and 1,000

Hundreds	Tens	Ones	Tenths	Hundredths	Thousandths

44

1.36

107

5

Complete the table.

	$\div 10$	$\div 100$	$\div 1,000$
30			
3 kg			
	0.9		
			9.0
		9.09	

Using the following rules, how many ways can you make 70?

- Use a number from column A
- Use an operation from column B.
- Use number from column C.

A	B		C
0.7	×	÷	0.1
7			1
70			10
700			100
7,000			1,000

Can you find a path from 6 to 0.06?
You cannot make diagonal moves.

6	× 10	× 10	÷ 100
÷ 10	× 100	× 100	÷ 10
× 10	÷ 10	÷ 1,000	÷ 100
÷ 1,000	× 1,000	× 100	0.06

Is there more than one way?
