

The Cure

One day, a girl called Sally decided to go on an adventure. She went into the woods and came across a house. All at once Sally didn't feel well, she was very hot and had a temperature. So she knocked on the door. A witch opened it and said "I have just the thing for you, I can give you a cure. Come inside".

Sally followed the witch inside. The witch went into another room and started to make a special mixture. Sally could see through a crack in the door that there were all sorts of things going into the mixture. She saw frog legs, newt eyes, bat wings, snail slime, snake tongues and rat tails!

The witch came out and gave Sally the mixture. She did not want to drink it, she asked "Is it pure, is it safe?".

"Sure it's pure." said the witch and cackled. Sally saw her chance. She ran out of the witch's house and home as fast as she could.

How many words could you find with the 'ure' sound in them? Colour them and list them here.
