

As humans, we have something we call senses. We experience the world we live in because of these 5 senses. As your first challenge can you write down your 5 senses and draw the part of the body you use for that sense.

Oh wow, you managed to write down all 5 senses.

Did you get help?

Now we are going to look further at each sense in detail.

Eyes

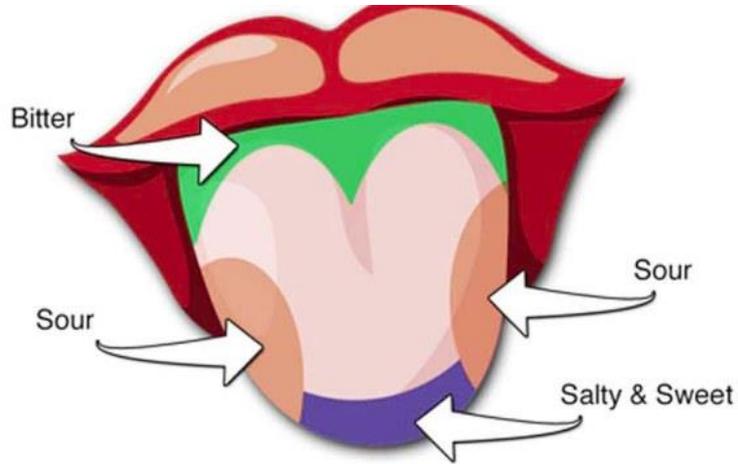

The eyes are one of the most important senses we have. Your eyes allow you to see everything in front of you. They give you the ability to move around the world safely. We see many amazing things every day.

Look around the room you are in right now.

What can you see?

Taste

Everything in the world has a taste. Our tongue can identify different tastes with different parts of the tongue.

What are some of your favourite tastes?

I love pizza and ice cream.

Touch

Touch can happen with any part of our body but we usually use our hands for touching objects.

Different objects will feel different. Some might be; spikey, sticky, slimy, sharp, tough, soft, hard and many more.

Draw some objects in this box.

What do they feel like?
