

## Creative Challenge

This week we are going to be taking to the sky's with our creative challenge. We would like you to have a go at creating your very own paper plane which you can turn into a bird, just like Humpy Dumpty. Once complete, and after a few test runs, we would like you to measure the distance that it can fly. Submit your final distance to us at school, along with a picture of your creation and we'll add you to the classroom leader board. I wonder whose bird will come out on top. We'll be judging the designs on their appearance as well as the distance that they can fly.

You can find some great paper plane instructions on this website:
