

Back by popular demand...!

Using the website Top Marks, go to Hit the Button, Division facts, Hit the Answer. Record your score for each of the times tables that you need to know by the end of year 3 (2,3,4,5,8,10). See if you can improve your lower scores (i.e. if you get 30 on your 10s but 2 on your 8s, don't have another go at your 10s!).

Times table	Mrs Best's attempt	My 1st Attempt	My 2nd Attempt
2	35		
3	34		
4	33		
6	30		
8	30		
12	34		

Feel free to add an extra column in if mum, dad, brother, sister want to flex their division knowledge too...I know some households took this very seriously last time and I loved the competitiveness!!

If you get stuck, remember you can count in those intervals (Using our method from Wednesday e.g. For $56 \div 8$, you could count in your 8s until you get to 56 and how many times you've counted will give you your answer- 7!)
