

13.01.21

I can compare numbers.

Today we are going to compare numbers by deciding which is greatest and which is smallest.

The best way I like to think about this question is how many sweets would you rather have? (The greater amount I am sure).

Using a **Blue** pencil/crayon for Greater and a **Red** pencil/crayon for Smaller

can you put a circle around the numbers on the next sheet?

Challenge

By either drawing or using physical equipment, can you prove that 18 is bigger than 12 and that 14 is smaller than 17?

1.	13	17	6.	14	9
2.	16	18	7.	19	20
3.	10	9	8.	17	13
4.	11	12	9.	12	14
5.	4	3	10.	8	7

1.	17	13	6.	3	9
2.	16	10	7.	12	20
3.	18	14	8.	13	17
4.	11	7	9.	12	9
5.	14	4	10.	8	19

Can you prove that:

18 is bigger than 12?

Can you prove that:

14 is smaller than 17?
