## PSHE- Recycling.

Recycling is a process where we turn cardboard, plastic, glass and other materials into something new.

Recycled cardboard can be made into pen cases, packaging and paper.

Recycled glass can be made into bottles, drinking glasses and windows.

Recycled plastic can be made into bags, outdoor seats and even shoes.

Recycling and reusing is amazing.

Today I would like to challenge you to recycle and reuse.

Go to your recycling bin and pick out a clean piece of cardboard or plastic and create something new using it.

Here are two websites to give you some ideas but be creative.

<https://www.goodhousekeeping.com/home/craft-ideas/g2970/cardboard-box-crafts/?slide=1>

<https://www.campliveoakfl.com/56-best-plastic-bottle-craft-ideas-for-kids/>

Once you are done, send a picture into school. I would love to see what you have created.

The children in school will do the same and we will take pictures.

Lets show how fantastically creative we can be.
