

21.01.21

I can identify animals and their groups.

One way of describing animals is to put them in groups. Some animals include; Fish, Reptiles, Amphibians, Birds and Mammals.

Cut and stick the pictures and descriptions below and put them into the correct groups.

Fish group		

Amphibian group		

Reptile group

We live in water all the time.

We are covered in scales.

We lay eggs.

We have fins, not arms or legs.

We have gills to let us breathe in the water.

We give birth to live young instead of laying eggs.

We have hair or fur.

We make milk to feed our young.

We start our lives in water, but can move on the land as adults.

We have wet skin.

We need to stay close to the water.

We lay eggs in the water.

We have legs, not fins.

We have two wings and two legs.

We lay eggs with hard shells.

Most of us can fly.

We lay eggs.

We have legs, not fins.

We have scaly skin.

We lay our eggs on dry land.
