

W5 Monday 1: Maths - Daily 10

27 January 2021 14:00

Staying match fit means we need to keep up the practise but we're not going to keep this up after half-term (though I do think that you should keep practising your times tables at the least, you know we'll be back to our usual morning routine when we do get back in class!).

We're going to try our Daily 10 again but this time I want you to fill in the table below.... If you got 10/10 last week then you need to think about changing EITHER the time interval or the level or type of challenge. If you do change it, then type over my typing to tell me what you did.

Have some practise goes and then when you are happy with your shortest time and highest score then fill in the table. :-) We'll mix it up in the future but these should keep you on your toes for a bit.

Level 3 ▼	Doubles/Halves ▼	Doubles: Up to 100 ▼
Level 4 ▼	Rounding ▼	Up to 999 to Nearest 10 ▼
Level 5 ▼	Multiplication ▼	×9 Table Up to 12 ▼
Extension		
Level 6 ▼	Division ▼	÷ 9 Tables Up to 12 ▼

Which challenge?	Time Interval (best)	Score
Doubling up to 100		
Rounding Up to 999 to the nearest 10		
Multiplication x 9 (or x 7) up to 12.		
Ext: Division		

The good news (yes that's good news) is you should start learning your 12 times tables... this shouldn't take you long if you know your other times

tables! It's just double your sixes. Or four times your threes!

Next week I'll be testing you on Daily 10 '12 times tables' multiply and divide.
