

I hope that you are feeling confident with using column multiplication to answer questions! Today, we are going to spend another session just making sure those skills and the steps to getting the answer are really embedded!

The questions are using the same skills of starting in the units, carrying into the next column if we need to etc but these ones might involve carrying more than once...

Remember, if you're not feeling confident then watch the video of Miss Brearey demonstrating how to use column multiplication.

If you are super confident then there is a challenge for you (scroll down for these).

1. 37×3
2. 27×5
3. 4×45
4. 43×8
5. 49×2
6. 73×5
7. 86×2
8. 54×3
9. 93×4
10. 62×8

Example: HTU

$$\begin{array}{r} 27 \\ \times 8 \\ \hline 216 \end{array}$$

1. I want to buy all my friends a bar of chocolate and the chocolate is 67p each. How much would it cost me to buy them for 5 of my friends? Write your answer in £ not pence.
2. If a school receptionist can type 74 words in one minutes, how many words can she type in 8 minutes?
3. I went on a shopping spree. I bought 19 bath bombs at £6 each and 4 pairs of shoes at £28 each. How much did I spend together?
4. If Mr Castledine eats 7 biscuits every day, how many will he eat in a year (365 days)?
