

On 3 occasions, complete a times table sheet (on the next page) and time yourself completing it. Don't worry about what order you answer the questions in- you might want to do the ones you are more confident in first! Once you have finished the sheet, mark your answers (or ask an adult to help) to see how many you have got right.

If there is a particular set of times tables that you have found tricky, you can focus on practicing those (maybe using a game on the Top Marks website!) before having a go at the next sheet.

You might want to stretch them out throughout the day.
