

Today, you're going to explore some online games to practice your division using your times table knowledge. If you know your times tables like the back of your hand, this is one of those things that becomes much easier!

Watch the bbc bitesize video about the relationship between multiplication and division...

There are 3 Top Marks games I'd like you to look at...

- Mental Maths Train (link below) choose the division train and the option of 2,3,4,5,8,10. There's not a time limit on this game and it phrases division questions in different ways which is always helpful! Spend some time practicing your division skills.

- Number fact family game (link below) practices using your times table knowledge to write division statements.

<https://www.topmarks.co.uk/number-facts/number-fact-families>

- Daily 10 (link below) gives you an option of levels, topics and time intervals between questions. I would like you to choose "level 3", "division", "mixed tables 2,3,4,5,8,10". Choose your time interval (how long you'll have in between each question) and answer your 10 questions! At the end, you'll get the answers so you can even mark your own!
