Task 3: Choosing Time

A big part of the EYFS curriculum is to explore the children's interests through play. This all help to develop your child's concentration, creativity and problem solving skills. Here are some examples of activities we choose in school.

- Read a book
- draw or colour a picture
- complete a jigsaw
- build in the construction
- create a masterpiece using junk modelling materials
- paint a picture
- dress up - role play
- write for pleasure - stories, shopping lists etc.
- play a board game
- bake a cake
- go on a nature walk

You may choose to do an activity from the list about or another activity of your choice.

Please post a photograph on the page below, in your child's One Note file as a record of their learning. Thank you.
