

25.2.21

Division by grouping

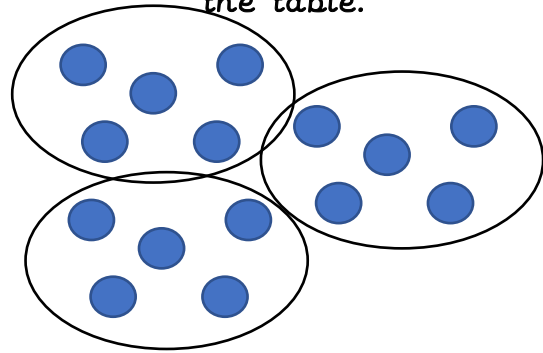

Use practical resources, or draw pictures, to help you solve these division calculations.

$$15 \div 5 =$$

For each calculation start by counting out the total number of objects that you start with.
Here I have drawn 15 spots to represent my M&M's.

Then group them into equal groups of 5.
Here I have put rings around my groups. You could do the same to your picture, or move your resources into clear groups on the table.

Count how many equal groups you have and write your answer.

$$15 \div 5 = 3$$

3 equal groups of 5.

Complete the following division questions by drawing a simple picture.

$12 \div 2 = \underline{\quad}$

$20 \div 5 = \underline{\quad}$

 equal groups of 2.

 equal groups of 5.

$9 \div 3 = \underline{\quad}$

$30 \div 10 = \underline{\quad}$

 equal groups of 3.

 equal groups of 10

$18 \div 3 = \underline{\quad}$

$16 \div 2 = \underline{\quad}$

 equal groups of 3.

 equal groups of 2.

$10 \div 5 = \underline{\quad}$

$14 \div 2 = \underline{\quad}$

 equal groups of 5.

 equal groups of 2.
