

Equilateral, isosceles and scalene triangles

Triangles can be classified into 3 different types, depending on the lengths of the sides. They all have tricky names! Read below to find out more.

1. Equilateral triangle

All three sides are equal.

2. Isosceles triangle

Two of the three sides are equal.

3. Scalene triangle

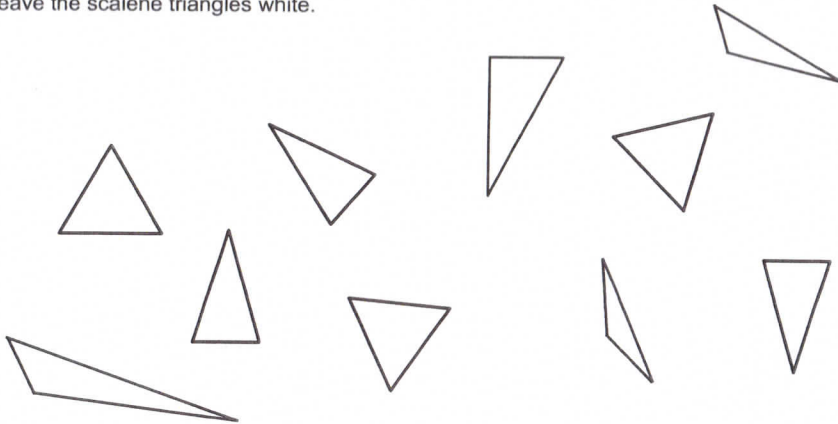

None of the sides are equal.

Colour the equilateral triangles blue.

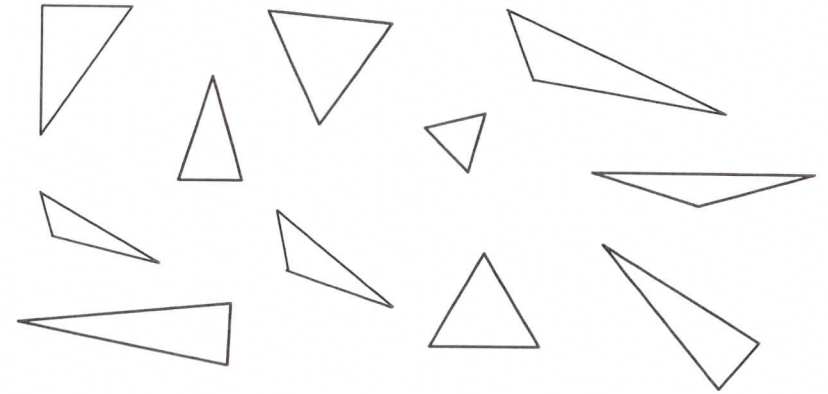

Colour the isosceles triangles red.

Leave the scalene triangles white.

Equilateral, isosceles and scalene triangles

1. Colour the equilateral triangles blue.
Colour the isosceles triangles red.
Leave the scalene triangles white.

Write the name of the type of triangle next to each triangle.
