## Safety at Home

Today we are going to focus on staying safe at home.

**Your Task:** Take a walk round your house and see if you can spot things that might not be safe if they were used in the wrong way. Imagine if these things could talk. What would they tell you to help you use them safely? Draw three of the things you spotted, and give them each a speech bubble. There is an example below of the kind of thing you could do.

Grown-ups love to use me to make their hot drinks, but be careful - I can get VERY hot. Never touch me, even if I'm not turned on.
