

Great Game of Britain

“We shall not cease from exploration, and the end of all our exploring will be to arrive where we started and know the place for the first time.” T.S. Eliot

Great Britain boasts rolling hills, intimidating mountains and postcard perfect seaside towns, many of which make it the envy of its neighbouring countries. We will go on a journey this half term to explore the rich variety of landscapes in our nation and use all that we experience as inspiration for our work.

As language specialists...

We will look at the traditional British authors that brought us classics such as *The Wind in the Willows* and Michael Morpurgo's *Tom's Sausage Lion*. We will be inspired by these to plan narratives and broaden our vocabulary. We will write poems inspired by the countryside and nature surrounding us, based on the poetry of Dorothea Mackellar and the contemporary prose in the spellbinding *Lost Words*. Our science and geography work will give us plenty of opportunity to explore a rich variety of non-fiction texts and structures, including *The Big Book of the UK*, gathering facts about the cities, food and landscapes of these isles. We will continue to focus on the Year 3 Grammar and Punctuation objectives and using correctly joined handwriting - especially when completing published pieces.

As mathematicians we will...

Continue to work hard on committing times table facts to memory. We will solidify our knowledge of multiplication and division and will put this knowledge to good use by mastering the formal method of multiplication before moving onto the formal method for division. We will continue to recap the formal strategies taught for addition and subtraction.

As expressive artists

We will study the masterpieces and styles of a variety of British artists' and emulate their techniques as we focus on representing the locality in art including Banksy and his street art.

As musicians

We will learn how to play a musical instrument with increasing accuracy. We will work as a class orchestra to play in unison and learn to follow notation to play the right notes at the right time!

As language specialists

We will continue to engage in French conversation and simple sentence structure.

As computer specialists

We will evaluate what positive things can come from using the internet and learn how images and information can be altered before being published.

As fitness experts

We will be putting together a class dance, working in small groups, pairs and independently to perform a range of movement patterns.

As philosophers

We will be looking at prayer in different religions. In our PSHE sessions, we will look at what it means to belong to a community. We will discuss the reasons for rules and law and what happens if we break them.

As historians we will...

study the famous landmarks and architecture that make British cities identifiable and continue to see how historical evidence and sources reveal changes over time.

As geographers we will...

have a secure knowledge of the four countries of the UK and the counties and cities therein. We will embark on a journey across Britain, passing major places, landmarks, rivers and mountains on our quest to explore. We will use atlases and maps to identify common map symbols.

KS2 Curriculum Aims 'name and locate counties and cities of the United Kingdom, geographical regions and their identifying human and physical characteristics, key topographical features and how some of these aspects have changed over time'

As scientists we will...

explore rocks, soils and fossils by learning about how they were formed and where they came from. We will compare soil samples and investigate rocks and their properties. Linking to our topic, we will consider what our ancient ancestors had available to them and how they used these resources.

Compare and group together different kinds of rocks on the basis of their appearance and simple physical properties. Describe in simple terms how fossils are formed when things that have lived are trapped within rock. Recognise that soils are made from rocks and organic matter.

Knowledge of the World

There are hundreds of islands all over the world that vary in size, shape and location. How is Great Britain different to other island nations of the world in terms of accessibility, population and weather, for example?

Citizenship and British Values

As humans we all have rights. As children, you have the right to health, education, family life, play, a standard of living and to be protected from harm. With rights, come responsibilities. What happens when this fails?

Ambitious thinking

What does it mean to be patriotic? When looking at Dorothea Mackellar's poem "My Country", we will think about the emotions behind belonging. It goes a lot deeper than World Cup football...!
